ANDROID WIRELESS SETUP

WIRELESS NETWORK INFORMATION

In order to access the DEF CON 25 Wireless Network, you must have already registered. If you have have not done so, please go here and take care of that first.

Once you have registered, download the DigiCert Root Certificate and install locally. You can obtain the certificate here.

Note: Android comes in many versions, flavors, shapes, sizes and smells. Please treat the following instructions as an approximate guide to this setup. Your experience may differ.

On your Android device, open Settings:
-> Security
-> Certificate Management
-> Install from storage
-> Navigate to and select **digicertca.cer**
-> Enter "Digicert DefCon CA" for the certificate name
-> Select "Wi-Fi" for Credential Use
-> Answer **Yes** or **OK** if prompted to accept the certificate

Next, connect and verify DefCon network radius server certificate.

On your Android device, open Settings:
-> Wi-Fi
-> Select the **DefCon** network
-> EAP method = PEAP
-> Phase 2 Authentication = MSCHAPv2
-> CA certificate = Digicert DefCon CA
-> Identity = *YOUR_USERNAME*
-> Anonymous Identity, leave this blank
-> Password = *YOUR_PASSWORD*
-> Select **Connect**

And now your are done!

But... if you still need help, please visit the Best Buy on South Maryland Parkway. Make sure you present your DEF CON badge.
